

DIAGRID STRUCTURA

"Excellence In Structural Designs & Engineering Solutions"

www.diagridstructura.com

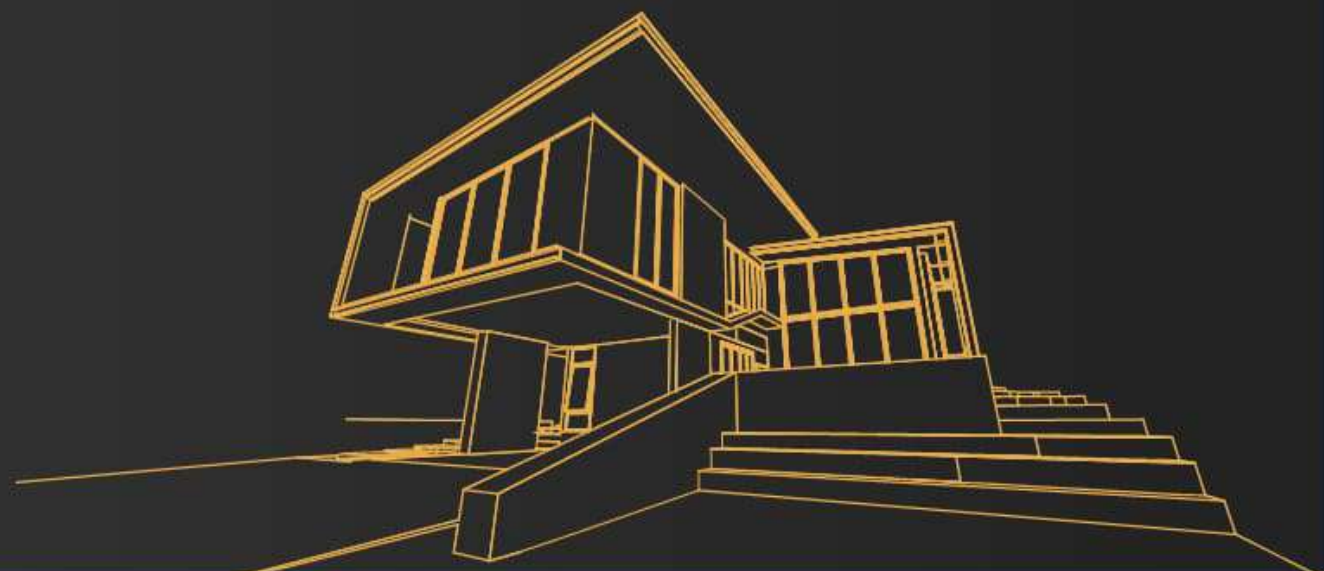

Who We Are:

At Diagrid Structura, we don't just engineer buildings—we empower ideas, elevate design and anchor vision in structural certainty.

Established in 2012 by Mahesh Kumar Katariya, we are a boutique structural engineering firm headquartered in Ahmedabad, India, with a singular focus:

“To create structures that are not only built to perform—but built to inspire, last and lead.”

Rooted in technical rigor and design sensitivity, our work translates architectural ambition into safe, elegant and constructible realities. With every project, we aim to deliver more than calculations—we deliver clarity, confidence and creative alignment.

What We Stand For:

✔ Excellence Without Exception

We approach each structure with uncompromising attention to detail, engineering discipline and a relentless pursuit of quality.

✔ Agility Meets Accuracy

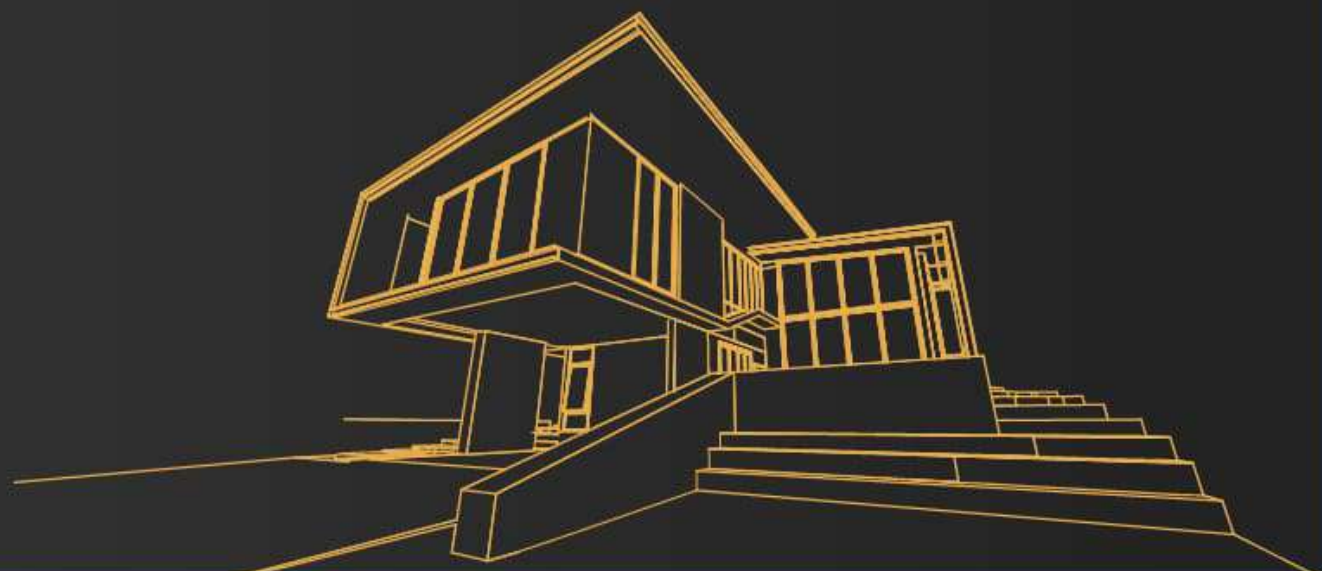

Our lean and expert-led team is built for speed, precision and adaptability—moving swiftly while ensuring every line, load and level is right.

✔ Collaboration That Builds More Than Structures

We integrate seamlessly with architects, developers and consultants to co-create solutions that are as coherent on site as they are on paper.

✔ Future-Ready Thinking

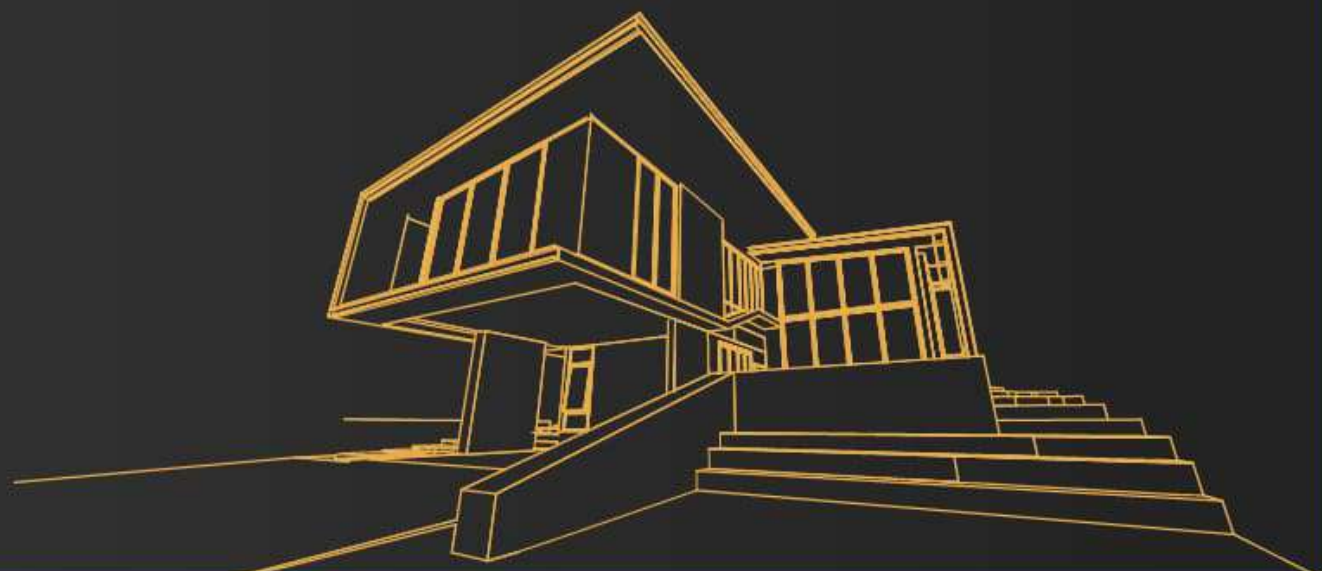

Our designs are not just compliant—they are smart, sustainable and strategic. Optimized for cost today. Built for resilience tomorrow.

What We Do Best:

- *Structural Design & Detailing*
- *RCC, Steel & Hybrid Structural Systems*
- *Post-Tensioned & Pre-Stressed Concrete*
- *Advanced 3D FEM & Non-linear Analysis*
- *Seismic Design & Retrofitting (IS 1893 / IS 15988)*
- *Foundation Design & Soil-Structure Integration*
- *Peer Reviews & Technical Audits*
- *BIM Integration for Complete Structural Coordination*

Whether it's a high-rise, a heritage temple or a sprawling campus—we engineer solutions that perform under pressure and deliver with precision.

Where We Work:

 *Residential Towers & Villas* |  *Commercial & Corporate Offices* |  *Institutional Campuses & Schools* |  *Religious & Cultural Complexes* |  *Industrial & Utility Infrastructure* |  *Healthcare & Hospitality Projects* |  *Retrofitting, Renovation & Special Structures*

From luxury homes to G+32 towers, we deliver scalable and site-adapted solutions across project scales.

Our Process:

Consult & Understand

We begin with a clear understanding of your goals, constraints and design language.

Analyze & Model

Structural options are developed using advanced tools and first-principles engineering.

Design & Document

Every output is code-compliant, construction-ready and aligned for interdisciplinary coordination.

Coordinate & Support

We stay engaged—from the drawing board to the construction site—resolving, refining and supporting.

Construction-Phase Engineering

We offer on-site visits, technical support and clarifications for smooth execution ground.

“Leadership You Can Trust”

 **Mahesh Kumar Katariya**
Founder & Principal Structural Engineer

Mahesh Kumar Katariya is the Founder and Principal Structural Engineer of Diagrid Structura, a firm renowned for delivering structurally sound, architecturally aligned and technically innovative solutions. Since establishing the practice in 2012, Mr. Katariya has been at the forefront of shaping buildings that are not only structurally efficient but deeply responsive to design vision and site context.

He earned his Bachelor of Engineering (B.Tech) from L.D. College of Engineering, Ahmedabad in 2009, followed by a Master's in Structural Engineering (M.Tech) from CEPT University, Ahmedabad in 2011—an academic foundation that sharpened both his analytical rigor and design sensibility.

With more than a decade of experience, Mr. Katariya has led the structural design of a wide range of projects—residential towers, institutional campuses, commercial hubs and architecturally ambitious landmarks. His approach balances engineering precision with creative problem-solving, resulting in structures that are buildable, cost-effective and enduring.

Under his leadership, Diagrid Structura has become a trusted collaborator for leading architects, developers and consultants across India. Mr. Katariya's commitment to technical excellence, responsive design and seamless coordination continues to set a high benchmark in structural consultancy. For him, structural engineering is not just about making buildings stand— it's about helping them last, inspire and perform with purpose.

Our Team:

We are a focused team of 18 structural professionals working across our two branches in Vastrapur and Nikol, Ahmedabad. Each team member brings a strong foundation in engineering principles, a commitment to design integrity and a passion for precision.

With a blend of experience and agility, our team is structured to respond swiftly to project demands—ensuring technical accuracy, seamless coordination and on-time delivery across all project stages.

Software Expertise:

At Diagrid Structura, we believe the right tools empower better decisions. Our team is proficient in a range of industry-standard software to ensure accurate analysis, efficient design and complete coordination:

AutoCAD – Drafting and detailing | ETABS – Structural analysis and design

STAAD Pro – Structural modeling and FEM | SAFE – Foundation and slab design

RCDC – Automated structural detailing | MS Office Suite – Documentation and reporting

This technical toolkit helps us deliver robust, code-compliant and constructible designs tailored to real-world site conditions and architectural intent. We provide the following services in the field of Civil & Structural Engineering.

Global Compatibility:

Designs compatible with IS, ACI & Eurocodes

BIM-enabled workflows: AutoCAD, Revit, ETABS, STAAD Pro, RCDC

Cloud-ready collaboration tools for cross-border teams

Clear and professional documentation for local and international stakeholders

Our Commitment:

At Diagrid, we go beyond drawings.

We deliver certainty.

That your structure will be safe, elegant and enduring.

That your design will be respected and realized.

And that your vision will be supported—every step of the way.
